

# BIO-RES

The revolutionary discovery that helps restore proper function to your body's most compromised metabolic functions.\*

## The **BIO-RES** Solution

Just like every plant has its own unique compositions of nutrients, every plant also has its own unique composition of specific energy frequencies that are resonant (synergistic) with the human body's own signaling frequencies.

A major breakthrough came when science discovered a way to capture and transfer high levels of these specific signaling frequencies into water. The consumption of this frequency-infused water can help restore proper function and balance to energy deficient metabolic processes that express themselves as symptoms of poor health.

This is the **BIO-RES** technology. Each bottle of **BIO-RES** is formulated to address specific disruptions of our metabolic functions.\*

# The Disruption of Metabolic Functions

Poor nutrition (processed foods) and toxicity (chemicals in our food, air, and water) combined with the increasing use of pharmaceutical drugs have wreaked havoc on our bodies ability to protect our health. The overwhelming levels of stress that these factors put on our bodies are compounded by the emotional stresses of our 21st century lifestyles as stress begets stress.

The brain's normal response to stress is to shift its energy resources toward it's fight or flight responses because the body's #1 goal is always survival. However, when stress becomes constant, this shifting of energy can rob the rest, repair, and regenerate functions of the body of their energy requirements. This energy shift can result in a loss of system functions that can express itself as a symptom of poor health and compromised immunity.

#### COMMON SYMPTOMS OF STRESS:

- Excessive weight gain
- Feeling Lethargic
- Brain Fog
- Anxious Feelings
- Poor Sleep
- Increased biomarkers of inflammation
- Premature aging of your skin

## Optimal Health

Each individual signal your brain uses has a different frequency that triggers a specific metabolic response. When working correctly, these back-and-forth signals help manage the body's blueprint for homeostasis and optimal health.\*

CRAVING CONTROL

ENHANCED METABOLISM

BETTER SLEEP

REPAIR & RESTORE

REDUCE STRESS

REPAIR & RESTORE

## AUTONOMIC NERVOUS SYSTEM THE MASTER REGULATOR OF METABOLISM

### SYMPATHETIC

"Fight or Flight"  
Response

### PARASYMPATHETIC

"Rest, Repair, &  
Regenerate"  
Response

Increased  
Stress  
Response

Increases Heart Rate

Constricts Blood Vessels/  
Increases Blood Pressure

Increases Blood Flow to  
Skeletal Muscles

Diverts Blood Flow Away  
from GI Tract

Reduces Digestive  
Enzyme Secretion

Reduces Glucose to  
Increase Blood Sugar

Stimulates Adrenal  
Glands to Secrete Stress  
Hormones

Decreases Heart Rate

Indirectly Dilates Blood  
Vessels

Decreases Blood Flow to  
Skeletal Muscles

Increases Blood Flow to  
GI Tract

Increases Digestive  
Enzyme Secretion

The brain uses its energy to send signals to your body's glands, organs, and tissues through the Autonomic Nervous System (ANS) to manage its "fight or flight" and "rest, repair, and regeneration" functions.
